Reliability Indicator:

Not established

Overall Length:

3.719 inches

Overall Height:

4.281 inches

Overall Width:

1.219 inches

Frequency Rating:

50.0 hertz single component and 400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Maximum Transformer Power Rating:

25.0 volt-ampere single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

5.0 amperes ac single component single secondary

Special Features:

Prietary rated but not included

Terminal Type And Quantity:

2 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
