Relial	bility Indicator:
Not es	stablished
Cente	r To Center Distance Between Mounting Facilities Parallel To Length:
1.187	inches single mounting facility single center group
Cente	r To Center Distance Between Mounting Facilities Parallel To Width:
1.187	inches single mounting facility single center group
Frequ	ency Rating:
50.0 h	ertz single component and 400.0 hertz single component
Input	output Phase Relationship:
Single	phase to single phase single component
Wind	ng Shielding Method:
Intern	al shield grounded to core and brought out to terminal single component
Body	Length:
3.500	inches
Body	Width:
3.000	inches
Body	Height:
2.180	inches
Inclos	sure Type:
Herm	etically sealed
Moun	ting Facility Quantity:
3 sing	le group
Moun	ting Method:
Threa	ded hole single group
Wind	ng Function And Quantity:
1 prim	ary single component and 2 secondary single component
Threa	dy Qty Per Inch (tpi):
32 sin	gle group
Threa	d Size:
0.138	inches single group
Wind	ng Operating Current:
70.00	milliamperes dc single component 2nd secondary
Wind	ng Operating Voltage:
43.00	ac volts single component 1st secondary
Threa	d Series Designator:
Unc s	ingle group
Termi	nal Type And Quantity:
8 pin	
Shelf	Life:
N/a	
Unit C	Of Measure:

NSN 5950-00-420-3433
