General Description:

Epoxy filled plastic case, 1.000 in. L, 0.650 in. Diameter 4 polytetrafluoroethylene insulated wireleads 3.500 in. L, operating temp range minus 60.0 to plus 160.0 degrees f, turns ratio 1 to 62.5, input voltage 180.0 voltsdc, output voltage 11.0 kilovolts dc peak; t102, ti-6850.1a, instruction bk, mals modified to three step brightness, pg vi-7

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
