Reliability Indicator:

Not established

Turn Quantity:

75 single component single winding

Inductance Rating:

83.00 microhenries single component single winding

Body Length:

0.625 inches

Body Outside Diameter:

1.562 inches

Inclosure Type:

Open

Mounting Method:

Terminal single group

Winding Conductor Size:

0.05707 inches american wire gage single component single winding

Special Features:

Conductor w/enamel insulation; multiple layer wound type

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
