Reliability Indicator:

Not established

Center To Center Distance Between Mounting Facilities Parallel To Length:

1.750 inches single mounting facility single center group

Center To Center Distance Between Mounting Facilities Parallel To Width:

1.750 inches single mounting facility single center group

Mounting Hole Diameter:

0.205 inches single group

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

3.375 inches

Body Width:

2.812 inches

Body Height:

1.000 inches

Inclosure Type:

Fully enclosed

Mounting Facility Quantity:

4 single group

Mounting Method:

Flange single group and unthreaded hole single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

100.0 milliamperes dc single component single secondary

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
