F	Reliability Indicator:
	Not established
C	Center To Center Distance Between Mounting Facilities Parallel To Length
4	1.000 inches single mounting facility single center group
C	Center To Center Distance Between Mounting Facilities Parallel To Width:
3	3.375 inches single mounting facility single center group
F	Frequency Rating:
5	50.0 hertz single component and 1.0 kilohertz single component
h	nput-output Phase Relationship:
S	Single phase to single phase single component
E	Body Length:
4	1.750 inches
E	Body Width:
4	I.750 inches
E	Body Height:
5	5.500 inches
h	nclosure Type:
C	Dpen
N	Nounting Facility Quantity:
4	l single group
N	Nounting Method:
Т	Threaded stud single group
۷	Vinding Function And Quantity:
2	2 primary single component and 7 secondary single component
T	Fhready Qty Per Inch (tpi):
1	8 single group
T	Thread Size:
С).312 inches single group
T	Thread Series Designator:
ι	Jnc single group
T	Ferminal Type And Quantity:
1	9 standoff insulator
S	Shelf Life:
٩	l/a
ι	Jnit Of Measure:
-	-
0	Demilitarization:
٢	No
F	Filg:
A	A058b0
