Reliability Inc	
Not establishe	
	nter Distance Between Mounting Facilities Parallel To Length
	single mounting facility single center group
	nter Distance Between Mounting Facilities Parallel To Width:
3.500 inches	single mounting facility single center group
Frequency Ra	-
50.0 hertz sin	gle component or 60.0 hertz single component
Input-output	Phase Relationship:
Single phase t	to single phase single component
Winding Shie	Iding Method:
Internal shield	grounded to inclosure single component
Body Length	:
7.050 inches	
Body Width:	
6.130 inches	
Body Height:	
8.188 inches	
Inclosure Typ	De:
Fully enclosed	i
Mounting Fac	cility Quantity:
6 single group	
Mounting Me	thod:
Unthreaded he	ble single group
Winding Fun	ction And Quantity:
1 primary sing	le component and 3 secondary single component
Winding Ope	rating Current:
10.0 amperes	ac single component 3rd secondary
Winding Ope	rating Voltage:
5.00 ac volts	single component all secondary
Terminal Typ	e And Quantity:
4 threaded stu	ld and 9 standoff, solder lug
Shelf Life:	
N/a	
Unit Of Meas	ure:
Demilitarizati	on:
No	
Fiig:	
A058b0
