Reliability Indicator:

Not established

Overall Length:

1.350 inches

Overall Height:

1.000 inches

Overall Width:

1.089 inches

Frequency Rating:

19.5 megahertz 2nd component

Input-output Phase Relationship:

Single phase to single phase 2nd component

Inclosure Type:

Fully enclosed

Mounting Method:

Tab single group

Winding Function And Quantity:

1 primary 2nd component and 1 secondary 2nd component

Terminal Type And Quantity:

8 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
