Reliability Indicator:

Not established

Overall Height:

4.531 inches

Input-output Phase Relationship:

Single phase to single phase single component

Winding Shielding Method:

Internal shield grounded to core 2nd component

Inclosure Type:

Fully enclosed

Mounting Facility Quantity:

8 single group

Mounting Method:

Threaded stud single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Terminal Type And Quantity:

10 solder stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
