Reliability Indicator:

Not established

Input-output Phase Relationship:

Two phase to two phase single component

Body Length:

0.500 inches

Body Outside Diameter:

1.062 inches

Inclosure Type:

Fully enclosed

Winding Function And Quantity:

1 secondary single component

Terminal Type And Quantity:

1 tab, solder lug and 1 turret

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
