Radio Frequency Coil - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5950-00-985-3036

Reliability Indicator:
Not established
Turn Quantity:
207 single component single winding
Inductance Rating:
685.00 microhenries single component single winding
Coil Form Type:
Hollow single component
Core Construction:
Powdered single component
Adjustment Device Drive Type:
Slotted screw single component
Body Length:
0.718 inches
Body Width:
0.718 inches
Body Height:
2.500 inches
Inclosure Type:
Fully enclosed
Mounting Method:
Clip single group
Rating Method:
Rating Method: Electrical single component single winding and winding turns single component single winding
-
Electrical single component single winding and winding turns single component single winding
Electrical single component single winding and winding turns single component single winding Winding Conductor Size:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug Shelf Life:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug Shelf Life: N/a
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug Shelf Life: N/a
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug Shelf Life: N/a Unit Of Measure:
Electrical single component single winding and winding turns single component single winding Winding Conductor Size: 0.00445 inches american wire gage single component single winding Winding Operating Current: 200.0 milliamperes dc single component single winding Adjustment Method And Quantity: 1 adjustable core single component Terminal Type And Quantity: 2 tab, solder lug Shelf Life: N/a Unit Of Measure: Demilitarization:
