Reliability Indicator:

Not established

Frequency Rating:

60.0 hertz and 400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Winding Function And Quantity:

1 primary and 3 secondary single component

Winding Operating Current:

500.0 milliamperes ac single component 2nd secondary

Winding Operating Voltage:

9.75 ac volts single component 2nd secondary

Terminal Type And Quantity:

9 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
