Reliability Indicator:

Not established

Body Length:

1.198 inches

Body Outside Diameter:

1.704 inches

Inclosure Type:

Fully enclosed

Rating Method:

Electrical single component single primary

Special Features:

Coil resistance to be 430 plus or minus 30 ohms at 25 degree plus or minus 5 degree c; vacuum impregnate with material per pn 17.26-09; end item e-3a aircraft

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
