Reliability Indicator:

Not established

Primary To Secondary Turn Ratio:

1 to 1 to 1 single component

Body Length:

0.500 inches

Body Width:

0.240 inches

Body Height:

0.350 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 2 secondary single component

Dc Resistance Rating In Ohms:

3.900 single component single primary

Terminal Type And Quantity:

6 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
