Reliability Indicator:	
Not established	
Overall Length:	
0.595 inches	
Furn Quantity:	
7-1/2 single component single primary	
nductance Rating:	
0.33 henry single component single primary and 0.33	7 henry single component single primary
Frequency Rating:	
7.9 megahertz single component	
Coil Form Type:	
Hollow single component	
Adjustment Device Drive Type:	
Slotted screw single component	
3ody Length:	
0.455 inches	
Body Width:	
0.280 inches	
Body Height:	
0.280 inches	
nclosure Type:	
Fully enclosed	
Nounting Method:	
erminal single group	
Rating Method:	
Electrical single component single primary	
Vinding Function And Quantity:	
primary single component	
Adjustment Method And Quantity:	
adjustable core single component	
Ferminal Type And Quantity:	
2 pin	
Shelf Life:	
l/a	
Jnit Of Measure:	
-	
Demilitarization:	
lo
