Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

0.800 inches

Body Width:

0.350 inches

Body Height:

0.600 inches

Maximum Operating Temp:

95.0 degrees celsius

Inclosure Type:

Fully enclosed

Special Features:

Designed to be mounted on printed wiring board

Supplementary Features (non-core):

Designed to be mounted on printed wiring board

Terminal Type And Quantity:

8 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
