Reliability Indicator:

Not established

Turn Quantity:

90 2nd component single winding

Inductance Type:

Fixed

Winding Quantity:

2 single component

Inclosure Type:

Partially enclosed, half shell

Mounting Method:

Friction single group

Rating Method:

Winding turns all components all winding

Features Provided:

Tinned wire leads

Winding Conductor Size:

0.02010 inches american wire gage all components all winding

Special Features:

400cps

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
