Reliability Indicator:

Not established

Frequency Rating:

1.0 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

0.430 inches

Body Outside Diameter:

0.940 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

60.0 amperes ac single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
