Radio Frequency Transformer - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/5950-01-098-0019

Reliability Indicator: Not established Overall Length: 0.310 inches Turn Quantity: 4 single component single primary Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding function And Quantity: 1 primary single component Minding Conductor Size: 0.01264 inches american wire gage single component single primary	
Overall Length: 0.310 inches Turn Quantity: 4 single component single primary Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
0.310 inches Turn Quantity: 4 single component single primary Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Turn Quantity: 4 single component single primary Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
4 single component single primary Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Frequency Rating: 111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
111.455 megahertz single component Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Coil Form Type: Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Hollow single component Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding turns single component single primary Unding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Overall Diameter: 0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
0.350 inches Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Inclosure Type: Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Hermetically sealed Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Mounting Method: Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Terminal single group Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Rating Method: Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Winding turns single component single primary Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Winding Function And Quantity: 1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
1 primary single component Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
Winding Conductor Size: 0.01264 inches american wire gage single component single primary	
0.01264 inches american wire gage single component single primary	
Terminal Tura And Outentitur	
Terminal Type And Quantity:	
3 wire lead	
Shelf Life:	
N/a	
Unit Of Measure:	
Demilitarization:	
No	
Fiig:	
A058b0
