Reliability Indicator:

Not established

Overall Length:

0.473 inches

Frequency Rating:

1.0 megahertz single component

Coil Form Type:

Hollow single component

Adjustment Device Drive Type:

Slotted screw single component

Overall Diameter:

0.390 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary, variable autotransformer type single component

Adjustment Method And Quantity:

1 adjustable core single component

Terminal Type And Quantity:

4 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
