Reliability Indicator:

Not established

Frequency Rating:

20.0 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

0.870 inches

Body Outside Diameter:

1.095 inches

End Application:

Singars system family; assault amphibious vehicle, command (aavc-7a1); radar set, firefinder (an/tpq-36); pads, an/usq-70; display group, data, tam e02777; tactical air opns module (an/tyq (23); howitzer, medium, towed, 155mm (19m apr83 (m198) ; processing & evaluation sys, an/tsq-90 d/c; fire support command & control system, an/uyk-102

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Operating Current:

50.0 milliamperes ac single component 4th primary input

Criticality Code Justification:

Feat

Winding Operating Voltage:

12.73 ac volts single component single primary

Special Features:

Weapon system essential

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
