Reliability Indicator:

Not established

Frequency Rating:

10.0 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

0.600 inches

Body Outside Diameter:

1.380 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 3 secondary single component

Winding Operating Voltage:

5.40 ac volts single component 3rd secondary

Terminal Type And Quantity:

12 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
