Reliability Indicator:

Not established

Frequency Rating:

50.0 hertz or 60.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Maximum Transformer Power Rating:

4.4 volt-ampere single component

Body Length:

1.625 inches

Body Width:

1.250 inches

Body Height:

1.375 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 2 secondary single component

Winding Operating Current:

260.0 milliamperes ac single component all secondary

Winding Operating Voltage:

115.00 ac volts single component single primary

Unpackaged Unit Weight (non-core):

5.000 ounces

Terminal Type And Quantity:

6 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
