Reliability Indicator:

Not established

Overall Length:

115.820 inches

Overall Height:

96.770 inches

Overall Width:

88.900 inches

Frequency Rating:

48.0 hertz and 66.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Winding Function And Quantity:

1 primary and 1 secondary single component

Winding Operating Current:

4.2 amperes dc single component single secondary

Winding Operating Voltage:

40.00 dc volts single component single secondary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
