Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Winding Operating Voltage:

120.00 ac volts and 208.00 ac volts and 240.00 ac volts and 416.00 ac volts and 480.00 ac volts and 800.00 ac volts single component single primary

Terminal Type And Quantity:

9 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
