Reliability Indicator:

Not established

Overall Length:

0.730 inches

Overall Height:

0.450 inches

Overall Width:

0.730 inches

Frequency Rating:

12.8 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

2 primary and 4 secondary single component

Winding Operating Current:

1.36 amperes dc single component 3rd secondary

Winding Operating Voltage:

3.62 ac volts single component 4th secondary

Terminal Type And Quantity:

19 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
