Reliability Indicator:

Not established

Overall Length:

0.375 inches

Overall Height:

0.180 inches

Overall Width:

0.375 inches

Frequency Rating:

12.8 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

2 primary and 3 secondary single component

Winding Operating Current:

0.003 amperes ac single component 1st secondary

Winding Operating Voltage:

1.50 ac volts single component 1st secondary

Terminal Type And Quantity:

10 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
