**Reliability Indicator:**

Not established

**Overall Length:**

2.780 inches

**Overall Height:**

0.850 inches

**Overall Width:**

1.510 inches

**Frequency Rating:**

1.6 kilohertz single component

**Input-output Phase Relationship:**

Single phase to single phase single component

**Inclosure Type:**

Fully enclosed

**Mounting Method:**

Terminal single group

**Winding Function And Quantity:**

2 primary and 2 secondary single component

**Winding Operating Current:**

0.82 amperes ac single component all secondary

**Winding Operating Voltage:**

53.00 ac volts single component all primary

**Terminal Type And Quantity:**

8 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A058b0
