Reliability Indicator:

Not established

Overall Length:

2.780 inches

Overall Height:

0.850 inches

Overall Width:

1.510 inches

Frequency Rating:

1.6 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

2 primary and 2 secondary single component

Winding Operating Current:

0.82 amperes ac single component all secondary

Winding Operating Voltage:

53.00 ac volts single component all primary

Terminal Type And Quantity:

8 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
