Reliability Indicator:

Not established

Impedance Rating In Ohms:

20.0 single component single primary

Frequency Rating:

1.0 kilohertz single component

Maximum Transformer Power Rating:

3.0 watts single component

Body Length:

0.820 inches

Body Outside Diameter:

0.750 inches

Maximum Operating Temp:

105.0 degrees celsius

Inclosure Type:

Hermetically sealed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 2 secondary single component

Winding Operating Current:

22.0 milliamperes dc single component single primary

Terminal Type And Quantity:

7 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
