Reliability Indicator:

Not established

Overall Length:

9.438 inches

Overall Height:

4.750 inches

Overall Width:

4.750 inches

Frequency Rating:

60.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Bracket single group

Winding Function And Quantity:

2 primary and 1 secondary single component

Winding Operating Current:

7.5 amperes ac single component single secondary

Winding Operating Voltage:

240.00 ac volts single component all primary

Terminal Type And Quantity:

14 threaded stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
