**Reliability Indicator:**

Not established

**Overall Length:**

9.438 inches

**Overall Height:**

4.750 inches

**Overall Width:**

4.750 inches

**Frequency Rating:**

60.0 hertz single component

**Input-output Phase Relationship:**

Single phase to single phase single component

**Inclosure Type:**

Fully enclosed

**Mounting Method:**

Bracket single group

**Winding Function And Quantity:**

2 primary and 1 secondary single component

**Winding Operating Current:**

7.5 amperes ac single component single secondary

**Winding Operating Voltage:**

240.00 ac volts single component all primary

**Terminal Type And Quantity:**

14 threaded stud

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A058b0
