Reliability Indicator:

Not established

Overall Length:

4.312 inches

Overall Height:

4.312 inches

Frequency Rating:

60.0 hertz single component

Input-output Phase Relationship:

Three phase to three phase single component

Maximum Transformer Power Rating:

20.0 volt-ampere single component

Winding Function And Quantity:

1 primary and 3 secondary single component

Winding Operating Current:

0.25 amperes ac single component all secondary

Winding Operating Voltage:

5.4293 ac volts single component 3rd secondary

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
