Reliability Indicator:

Not established

Overall Length:

0.755 inches

Overall Height:

0.500 inches

Overall Width:

0.755 inches

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Terminal Type And Quantity:

6 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A058b0
