**Reliability Indicator:**

Not established

**Frequency Rating:**

10.0 kilohertz single component

**Input-output Phase Relationship:**

Single phase to single phase single component

**Maximum Transformer Power Rating:**

30.0 volt-ampere single component

**Inclosure Type:**

Fully enclosed

**Mounting Method:**

Terminal single group

**Winding Function And Quantity:**

1 primary and 4 secondary single component

**Winding Operating Current:**

750.0 milliamperes ac single component single primary

**Winding Power Rating:**

6.24 volts-amperes single component 4th secondary

**Winding Operating Voltage:**

50.00 ac volts single component 1st secondary

**Terminal Type And Quantity:**

13 pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A058b0
