Reliability Indicator:

Not established

Frequency Rating:

10.0 kilohertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Maximum Transformer Power Rating:

30.0 volt-ampere single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 4 secondary single component

Winding Operating Current:

750.0 milliamperes ac single component single primary

Winding Power Rating:

6.24 volts-amperes single component 4th secondary

Winding Operating Voltage:

50.00 ac volts single component 1st secondary

Terminal Type And Quantity:

13 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
