Reliability Indicator:

Not established

Overall Length:

1.250 inches

Overall Height:

0.910 inches

Overall Width:

1.250 inches

Impedance Rating In Ohms:

135.0 single component single primary

Maximum Transformer Power Rating:

10.0 milliwatts single component

Primary To Secondary Turn Ratio:

1 to 1 single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Criticality Code Justification:

Feat

Special Features:

Application

Nuclear Hardness Critical Feature:

Hardened

Terminal Type And Quantity:

6 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
