Reliability Indicator:

Not established

Overall Length:

3.810 inches

Overall Height:

3.050 inches

Overall Width:

1.900 inches

Frequency Rating:

400.0 hertz single component

Input-output Phase Relationship:

Three phase to three phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 primary and 1 secondary single component

Winding Operating Current:

0.042 amperes ac single component single secondary

Winding Operating Voltage:

208.00 ac volts single component single primary

Terminal Type And Quantity:

6 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
