Reliability Indicator:

Not established

Impedance Rating In Ohms:

2.5 single component single secondary

Frequency Rating:

50.0 hertz and 10.00 kilohertz single component

Body Length:

7.500 inches

Body Width:

7.000 inches

Body Height:

3.500 inches

Inclosure Type:

Fully enclosed

Winding Function And Quantity:

1 primary and 1 secondary single component

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
