Reliability Indicator:

Not established

Frequency Rating:

50.0 hertz or 60.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

9.000 inches

Body Width:

9.000 inches

Body Height:

7.500 inches

End Application:

5840-01-192-7572, transmitter, radar

Winding Function And Quantity:

2 primary and 2 secondary single component

Cubic Measure (non-core):

607.5 cubic inches

Winding Operating Voltage:

50.00 ac volts single component 1st secondary

Terminal Type And Quantity:

17 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
