Reliability Indicator:

Not established

Overall Length:

1.800 inches

Overall Height:

0.666 inches

Overall Width:

0.750 inches

Inductance Rating:

396.00 microhenries and 484.00 microhenries all components single winding

Frequency Rating:

12.0 kilohertz single component

Winding Quantity:

2 single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Rating Method:

Electrical all components single winding

Terminal Type And Quantity:

4 pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
