Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

600.0 amperes ac single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

2 threaded stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
