Reliability Indicator:

Not established

Turn Quantity:

240 1st component single secondary

Input-output Phase Relationship:

Single phase to single phase 1st component

Body Length:

1.450 inches

Body Outside Diameter:

1.312 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Rating Method:

Winding turns 2nd component single winding

Winding Function And Quantity:

1 primary 1st component and 1 secondary 1st component

Features Provided:

Tinned wire leads

Winding Conductor Size:

0.01594 inches american wire gage 2nd component single winding

Terminal Type And Quantity:

6 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
