**Reliability Indicator:**

Not established

**Inductance Rating:**

0.12 microhenries single component single primary

**Body Length:**

0.160 inches

**Body Width:**

0.125 inches

**Body Height:**

0.125 inches

**Inclosure Type:**

Fully enclosed

**Rating Method:**

Electrical single component single primary

**Winding Operating Current:**

455.0 milliamperes ac single component single primary

**Dc Resistance Rating In Ohms:**

0.170 single component single primary

**Quality Factor:**

32 single component single primary

**Terminal Type And Quantity:**

2 bonding pad

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A058b0
