Reliability Indicator:

Not established

Inductance Rating:

1.80 microhenries single component single primary

Body Length:

0.160 inches

Body Width:

0.125 inches

Body Height:

0.125 inches

Inclosure Type:

Fully enclosed

Rating Method:

Electrical single component single primary

Winding Operating Current:

185.0 milliamperes ac single component single primary

Dc Resistance Rating In Ohms:

3.000 single component single primary

Quality Factor:

30 single component single primary

Terminal Type And Quantity:

2 bonding pad

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
