Reliability Indicator:

Not established

Overall Height:

6.170 inches

Frequency Rating:

50.0 hertz single component and 400.0 hertz single component

Input-output Phase Relationship:

Single phase to single phase single component

Maximum Transformer Power Rating:

15.0 volt-ampere single component

Body Length:

5.670 inches

Body Width:

1.130 inches

Body Height:

5.670 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

300.0 amperes ac single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

2 threaded stud

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A058b0
