Reliability Indicator:

Not established

Inductance Rating:

35.00 henry single component single primary

Body Length:

0.250 inches

Body Outside Diameter:

0.095 inches

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Operating Current:

1.6 amperes dc single component single primary

Dc Resistance Rating In Ohms:

0.060 single component single primary

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
