Reliability Indicator:

Not established

Input-output Phase Relationship:

Single phase to single phase single component

Inclosure Type:

Fully enclosed

Mounting Method:

Terminal single group

Winding Function And Quantity:

1 secondary single component

Winding Operating Current:

500.0 amperes dc single component single primary

Special Features:

Primary rated but not included

Terminal Type And Quantity:

2 wire lead

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
