Captive nut single group Winding Operating Current:
Winding Operating Current:
20.0 amperes ac single component single secondary
20.0 amperes ac single component single secondary
Criticality Code Justification:
Feat
Winding Operating Voltage:
8.00 ac kilovolts single component single winding
Special Features:
Items are being coded as critical to insure source inspection will be performed at the point of manufacture, prior to material receipt by the us
navy or other dod components. These items are piece parts or end items in support of vital military hardware necessary to sustain the
successful mission of the ships, submarines, and shore stations of the us navy. Critical features including, but not limited to, dimensions,
tolerances/clearances, electronic characteristics, and metallurgical properties will bespecified for government q ar (quality assurance
representatives) to insure the highest possible degree of quality and reliability of these parts being delivered under navicp contracts
