Reliability Indicator:

Not established

Overall Length:

11.500 inches

Center To Center Distance Between Mounting Facilities Parallel To Length:

8.500 inches single mounting facility single center group

Center To Center Distance Between Mounting Facilities Parallel To Width:

8.500 inches single mounting facility single center group

Mounting Hole Diameter:

0.516 inches single group

Input-output Phase Relationship:

Single phase to single phase single component

Body Length:

11.000 inches

Body Width:

11.000 inches

Body Height:

3.000 inches

Inclosure Type:

Fully enclosed

Mounting Facility Quantity:

4 single group

Mounting Method:

Unthreaded hole single group

Winding Function And Quantity:

1 secondary single component

Terminal Type And Quantity:

2 screw

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A058b0
